

HEAD X4 PUMP

Features

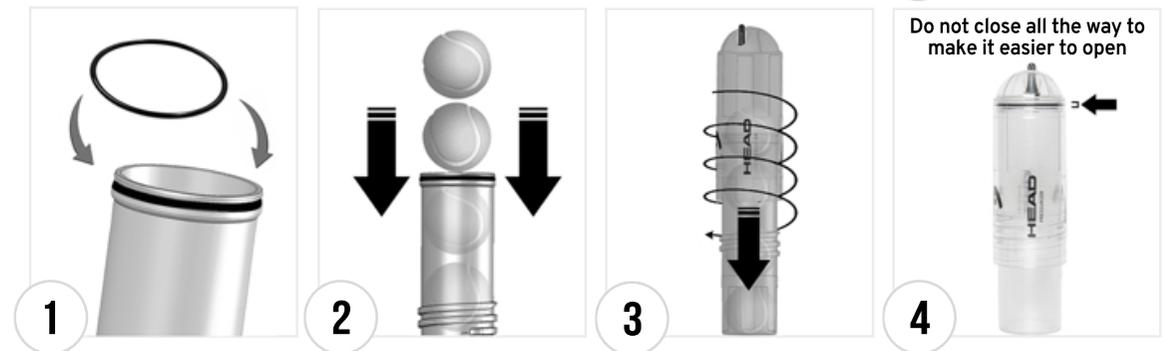

Weight	440 g / 14.52 oz
Weight with air pump:	593 g / 21.91 oz
Length:	310 mm / 12.20 in
Cover width:	85 mm / 3.34 in
Cylinder width:	70 mm / 2.75 in

Instructions

Introduce up to four tennis or padel balls inside the cylinder and screw the cover. Remember to place the O-ring to seal the air inside the HEAD X4 PUMP and do not close all the way to make it easier to open.

Insert the nozzle of the air pump into the valve of the product and pump with the tab raised until reaching a pressure on the gauge of 22 to 34 PSI. Next, pull down the tab on the air pump and remove its nozzle.

Warning! Do not forget to remove the air through the valve using the plug before opening the HEAD X4 PUMP again.
